

FAQ - Global Sustainability Conference 2024

What is the Global Sustainability Conference?

The conference drives forward critical discussions on sustainable practices across the built and natural environments, aligning with RICS' core values of environmental stewardship and social responsibility.

The Global Sustainability Conference promotes essential discussions on sustainable practices within both the built and natural environments, aligning with RICS' commitment to environmental stewardship and social responsibility.

Why is this conference important?

This conference tackles the urgent demand for sustainable development, focusing on actionable strategies in ESG frameworks, net-zero initiatives, and decarbonisation to promote long-term environmental progress.

Why was this conference created?

The event addresses the global call for sustainable practices, encouraging thought leadership in real estate, construction, and land management while aligning with RICS' sustainability objectives.

What are the key dates and events?

5 December 2024: Digital sessions starting in APAC time zones, progressing through Europe, and concluding in the Americas.

How much CPD will I receive?

Participants will earn 7.5 hours of CPD.

How many sessions will be featured, and what topics will be covered?

There are 12 sessions covering carbon strategies, ESG and finance integration, land management, biodiversity, data-driven sustainability, circular economy, urban resilience, WEF Nexus, retrofitting, healthy buildings, residential retrofits and designs promoting health, safety, and sustainability, etc.

What are the key takeaways for participants?

- Access to session recordings for up to 90 days
- A comprehensive post-conference report
- Repository of materials shared during sessions
