

Explaining the Commission work programme **2025**

11 February 2025

What is the Commission work programme?

Every year, the Commission adopts its annual work programme setting out the list of the most important new policy and legislative initiatives it will take in the year ahead.

The work programme is a key vehicle to deliver on commitments outlined in the **Political Guidelines** and the **mission letters** sent by President von der Leyen to each College Member.

Following its adoption, the work programme is presented to the European Parliament Plenary and subsequently to the General Affairs Council.

On the basis of the Commission work programme and priorities put forward by the other institutions, the Commission, the European Parliament and the Council establish a Joint Declaration on the EU's legislative priorities for 2025 and Joint Conclusions on priorities for the term.

Simplifying rules and effective implementation

To become more prosperous, competitive and resilient, EU citizens and businesses must be protected from unfair competition, obstacles to accessing capital, high energy costs and the imminent danger of climate change. One of the main priorities for the Commission is to address these challenges, including by making our rules simpler and more effective.

Some key initiatives for simplification (1)

This work programme presents a first set of Omnibus proposals that simplify various pieces of legislation, alongside a record number of initiatives with a strong simplification dimension. They will contribute to achieving the goal of reducing administrative burdens by at least 25%, and at least 35% for small- and medium-sized enterprises (SMEs).

A first series of Omnibus packages will be on sustainability, and on investment simplification. These will be followed by another omnibus package, including on small mid-caps and removal of paper requirements, a Digital package and a Common Agricultural Policy simplification package.

Other examples of key initiatives with significant simplification dimension:

- Industrial Decarbonisation Accelerator act
- Review of the Securitisation Framework

⁽¹⁾ Simplification and implementation are key priorities of the Commission. These are only a few examples on the new initiatives. To see the full picture, please refer to the section below where simplification efforts have been highlighted in blue.
