

RICS Framework: terms of engagement

The headings contained in this framework for terms of engagement are based directly upon the list of **mandatory** required content set out in **VPS 1 para 3.1**, and the commentary which follows, in *RICS Valuation – Global Standards* effective from 31 January 2025.

[Please note: The further guidance denoted in italics [and square brackets] are for information purposes only and are not intended to be included in the content of any document prepared using this framework.]

[DISCLAIMER

*“These documents are intended as a general framework only to assist suitably qualified valuation practitioners to comply with the requirement for minimum content of terms of engagement and valuation reports specified in **VPS 1** and **VPS 6** of the current *RICS Valuation – Global Standards*. RICS makes no representation as to their suitability to any particular situation or set of circumstances. The practitioner shall need to exercise their own skill and judgment to form a view as to their suitability to a given situation and will need to tailor them as they see fit in each case. Please note that the documents have been designed as a single suite and are intended for use in conjunction with each other and as such we recommend that care is taken to ensure that the individual documents remain consistent with each other. In particular, it is recommended that special care is taken to ensure statements describing the scope and depth of inspection and investigations and the attendant valuation assumptions referred to within the terms of engagement are consistent with corresponding statements made within the valuation report itself.”]*

This section should define the scope and depth and method of all investigations including site inspection and desktop enquiries into matters affecting value. In other words, it defines and limits the due diligence you will carry out in preparing the valuation and will state the assumptions you will make to cover the limits of your due diligence. The following list of matters which are often not fully investigated is derived from VPGA 8 para 2. It is not exhaustive and is offered only as a guide. You must accept responsibility for stating clearly the scope and depth of investigations and enquiries you will or will not make and the assumptions these give rise to.]</i></p> <p>In order to provide a valuation report within a reasonable timeframe and at an economic cost, the following limitations in the scope of inspections and due diligence in enquiries are agreed together with the necessary assumptions which will be adopted to cover uncertainties</p> <p>Title:</p> <p>We will examine Title obtained from the Land Registry (or client legal advisor).
